	File Code	JTC-HQ-OP-XZ-2022-001	Version	1.0	Set Date	2022/2/28
	File Name	Contraband and restricted goods management regulations	Version Number	20220228	Execution Date	2022/3/1

Contraband and Restricted Goods Management Regulations

1) Purpose

In order to standardize the receiving standards, protect the safety of personnel and cargo transportation, improve the quality of network-wide operation and avoid safety hazards, this regulation is made.

2) Scope of application

All J&T CARGO HUB

3) Definition

3.1 State laws and administrative regulations expressly prohibit the transport of goods.

3.2 corrosive, radioactive and other goods that may endanger the safety of the means of transport, persons and property.

3.3 Where explosive, flammable and other dangerous properties, in the transportation, handling, storage process, under certain conditions can cause explosions, combustion, resulting in personal injury and property damage and other accidents of flammable and explosive substances.

3.4 Items prohibited from being received or transported by the company.

4) Details of contraband

4.1 The following names, which are not listed but are confirmed to be dangerous goods, will be arbitrated as Class II contraband.

4.2 The outer packaging has contraband identification, but the contents are inconsistent with the name on the packaging and non-contraband, according to secondary contraband arbitration.

4.3 Receiving and transporting other categories, all of them will be arbitrated as second-class contraband and bear the corresponding losses.

Serial number classification level contraband goods name and other arbitration

			knives in the national "control knife identification standards"; (not open) Blade and tip chamfer radius greater than 2.5 mm of various types of crafts, gifts and other knives, and not in the national "control of knives to identify standards" can be charged
5	Tobacco	Grade 1	Tobacco (grass) tobacco (≥ 5kg), cigarettes (2 or more than 400 cigarettes, flowers and tobacco and tobacco products not under the supervision of the State Tobacco Administration is not listed, but the need to produce the relevant supporting documents)
6	Air transport embargo	Grade 1	Spices, fragrances, perfumes and all other liquids, durum, asbestos, airbags, air pressure pumps, submersible pumps, bricks, stereos, dry batteries, batteries, uninterruptible power supply, magnetic materials, items that can cause emotional irritation or discomfort to the flight crew or the pilot, affect the correct execution of the mission or affect the pilot, such as anesthesia, poison, etc.
7	Battery	Grade 1	Finished or semi-finished batteries with liquid or gas inside such as: aldehyde battery, lead storage battery, fuel cell, liquid battery, alkaline battery, alkaline storage battery, Varta battery, enhanced liquid-rich battery and other types of batteries
			finished batteries such as: batteries, lithium iron batteries, rechargeable batteries / mobile power, cell phone batteries, used batteries, lead crystal batteries, silver zinc batteries, iron nickel batteries, nickel cadmium batteries, cigarette lighters and other types of batteries
		Remarks: new original factory original packaging 1-9 dry cell batteries (including products with 1-9 dry cell batteries), button cell batteries can be shipped normally	
		Grade 2	All lithium batteries and all electric vehicles, toys, machines, equipment, etc. containing lithium batteries

	File Code	JTC-HQ-OP-XZ-2022-001	Version	1.0	Set Date	2022/2/28
	File Name	Contraband and restricted goods management regulations	Version Number	20220228	Execution Date	2022/3/1

			that are not in their original packaging (non-original original must be reported in advance)
8	Animal	Grade 2	Snakes, crocodiles and other live animals and specimens, animal bones and skins without nitrate or medicine, carcasses, untreated animal hides and skins, blood products, all kinds of excrement, etc. (human organs, limbs, blood products, etc. according to the first level of contraband arbitration)
9	Audio and video products	Grade 2	Refers to the content of audio tapes, video tapes, records, laser discs and laser video discs, etc.
10	Special valuables	Grade 2	(diamond, gold and silver, coins, cash, jade, jade, platinum, jewelry, jewelry, name painting, etc.), cards and tickets related to finance (credit cards, bank cards, financial cards, recharge cards), tickets, checks, non-cash tickets, blank travel tickets, valuable certificates, etc.), antiques and cultural relics, pianos, mahogany furniture
11	Other categories	Grade 2	Marine pollutants, unidentified particles with dangerous markings, powders (powder), etc.
			Zero pressure (pressure gauge reading) hydraulic bottles / air pressure bottles / compression tanks and other tanks and other pressure bottles/ tanks, open mouth not as contraband penalties
			Common press bottle / cans: automatic spray paint, hairspray, air freshener, spray insecticide, foam caulk, etc.
			Non-original sales package containing oil motorcycles, oil-containing machines
			The outer package name is contraband or contraband logo, but the contents do not match the package name and are non-contraband (judged by the outer package name, logo and other relevant information for the first level, the contents are consistent with the description, not through the test report or other ways to appeal)

			downgrade or write-off)
--	--	--	-------------------------

Remark: The goods whose names are not in the above scope but in the national "Catalogue of Dangerous Chemicals" are defined as dangerous chemicals.

	File Code	JTC-HQ-OP-XZ-2022-001	Version	1.0	Set Date	2022/2/28
	File Name	Contraband and restricted goods management regulations	Version Number	20220228	Execution Date	2022/3/1

5) Restricted Goods

The company's existing conditions do not allow the receipt and transport of goods, restricting the receipt and transport of goods sector violations, resulting in losses borne by the receiving network, the specific classification breakdown is as follows: Serial number classification definition name example exceptions can be transported

No	Classifications	Breakdown of categories
1	Large, extra-long, extra-high category	<p>1) large cargo: a single piece \geq 2 tons or a single piece of volume \geq 4 cubic meters Prohibit the collection and transportation of length > 6M, width > 2.2m, height > 2.2m</p> <p>2) urban areas within the no-go area, one side of the length > 3 meters; width > 1.6 meters; height > 1.8 meters Non-no-go area unilateral length > 4 meters; width > 1.6 meters; height > 1.8 meters</p> <p>If it can be inverted or detachable, it will be calculated according to the size after inverted/ detachable. Delivery/upstairs business need to receive and send stores to negotiate the operation, the cost is settled according to the oversized operation costs</p>
2	Liquid	<p>1) A single piece of 2KG (L) within the normal determination of responsibility for damage, claims; 2-25KG (L) non-violation of the damage caused by the operation is not determined, no claims, if the damage to other goods sent stores need to bear the responsibility for damage</p> <p>2) Alcoholic alcohol > 53 degrees</p>
3	Fragile category fragile products	<p>Glass \geq 30%, marble, etc. Ceramics, glass, marble, fish tanks and other liquors, display cases, ceilings, lamps, LCD screens</p>
4	Strange shape naked	Irregular shape and obvious sharp edges, nail barbs and other protruding, threatening the safety of personnel and goods during loading and unloading operations. Except for
